PROJECTS

➢ **Sales Team Management Android Application**   **Aug'25-Sept'29**
Technologies Used: Java, Android, Node.js, MpAndroidCharts, Firebase MLKit.
- It is an app for management of a sales team led by multiple admins. The app uses **Firebase real-time database** to store data. Separate logins for salespersons and admins using **otp** verification.
- **Commodities** are displayed by the admins in the **inventory** and quantities are updated automatically when they are sold by the salespersons.
- **Profile** of each salesperson is visible to admins whereas salesperson can see only his/her profile.
- All employees can have **personal communication** within themselves and admins as well as **global communication** with all members of sales team. **Notification** feature for admins is also included.
- The performance of salespersons can be analyzed with the help of **monthly leader-board** and **graphs** showing their progress over time. It also **predicts** the daily sale of salesperson using their previous records.

➢ **Get Connect and Let The VIP Down Android Application**   **Jan'25-Jan'27**
Technologies Used: Java, Android, Firebase, Google Map API.
- This project is made for **reducing the wastage of time** of people by monitoring the presence of officials in the concerned department. It consists of two apps user-side and officials-side versions.
- The users are able to track the **location** of official if he/she is present in the **geo-fence** of the govt. building.
- The officials can create a **sub-circle** so that only concerned people can **track** him/her by the security code.
- It also works as a **navigator** for users by showing the path for them to the concerned location.
- The user can also give **feedback** if the officials do not follow the rules of the organization.

AREAS OF INTEREST

- Data Structures
- Algorithms
- Android App Development
- Object Oriented Programming
